SUMMARY

Aspiring Software Developer pursuing a Higher National Diploma in Information Technology, with hands-on experience building full-stack web applications using HTML, CSS, JavaScript, React, PHP, Laravel, Java, and MySQL, including full MERN stack development (MongoDB, Express.js, React.js, Node.js). Skilled in developing secure, responsive, and user-friendly applications through academic and personal projects, with additional experience in UI/UX and graphic design. Strong problem-solving, teamwork, and communication skills, with experience working independently in a remote environment and a passion for continuously learning modern software development technologies.

PROFESSIONAL EXPERIENCE

Software Engineer – Google

Feb 2024 | Palo Alto

- Build and improve backend services for internal tools using Node.js and Google Cloud, delivering new features and enhancements.
- Identify and fix performance bottlenecks to improve system reliability and responsiveness.
- Collaborate with cross-functional engineering teams, review code, and streamline development processes to accelerate delivery.

Online Sales Assistant – Rizo Shop

2022 – 2023 | Bahrain (Remote)

- Resolved customer inquiries and guided purchasing decisions, ensuring high customer satisfaction scores in a remote environment.
- Processed and confirmed customer orders online.
- Maintained good communication and customer service in a fully remote setting.

PROJECTS

Personal Portfolio

- A modern personal portfolio showcasing my skills and projects in software development, UI/UX design, and graphic design. Built with React.js and featuring responsive design, animations, projects, technical skills, resume, and contact information.

LearnHub — Online Learning Platform

- Full-stack MERN online learning platform (Udemy-style) with JWT authentication, role-based dashboards for students/instructors/admins, Stripe payments, Cloudinary video uploads, quizzes, auto-generated certificates, and real-time chat. Full-stack online learning platform built using MongoDB, Express, React, and Node.js. Features include JWT-based authentication, role-based dashboards for students, instructors, and admins, Stripe payment integration, Cloudinary-hosted video lectures, section-based quizzes, auto-generated PDF certificates, and real-time chat via Socket.io.

Aswesuma Benefits Application & Tracking System

- A web-based Aswesuma welfare benefits application and tracking system built with Laravel, React.js, and MySQL. Full-stack welfare management system built using Laravel, React, MySQL, REST API, and JWT Authentication. Features include citizen registration, online benefit applications, claims, objections, application tracking, and an administrative dashboard for managing welfare requests.

Event Management System

- Java desktop application developed using Java Swing, MySQL, and JDBC. Features include secure user login, event management, customer management, venue management, booking management, payment handling, and report generation. Built using Object-Oriented Programming (OOP) principles with a user-friendly graphical interface.

Endangered Species Website

- Responsive frontend website developed using HTML, CSS, and JavaScript to present information about endangered species with a clean, user-friendly interface.

JavaScript Calculator

- Interactive calculator developed using HTML, CSS, and JavaScript, supporting basic arithmetic operations.

JavaScript Password Generator

- Technologies: HTML, CSS, JavaScript. Developed a web-based password generator application. Implemented random password generation using JavaScript. Designed a simple and user-friendly interface using HTML and CSS. Allows users to generate secure passwords quickly.

PlayZone Arena — Sports Ground Booking Website

- Modern responsive WordPress website for a sports ground booking service. Features ground listings, availability checking, pricing, ground details, booking flow, and contact information. Built with WordPress with a focus on responsive UI/UX and user-friendly navigation.

Zain Cafe House — WordPress Café Website

- Responsive café website developed using WordPress. Features café branding, navigation, hero section, menu/content sections, call-to-action buttons, and responsive layout. Designed with a focus on clean UI, visual presentation, and user experience.

LANGUAGES

- English (Fluent)
